

WhatsApp Go-Live

Complete Checklist for Wapply

Business: Wapply (WhatsApp Business Bot)

Domain: wapply.store

Backend: wapply-api.onrender.com

Frontend: wapply.vercel.app

Estimated total time: 5-10 days (most waiting is for Meta review)

Phase A: Setup & Verification (Do Now, In Parallel)

Step A1: Submit Business Verification

Go to Meta Business Settings > Security Center > Business Verification. Select Sole Proprietorship. Enter your PAN number as Tax ID. Enter your name exactly as on PAN card.

Where: business.facebook.com/settings | Time: ~5 min

Step A2: (Optional) Try Udyam Registration

If PAN verification fails, register at Udyam portal as backup. Use Aadhaar + PAN for registration.

Where: udyamregistration.gov.in | Time: ~10 min

Step A3: Create Meta Developer App

Go to Meta for Developers > My Apps > Create App. Select 'Business' as app type. Name it 'Wapply'.

Where: developers.facebook.com | Time: ~10 min

Step A4: Add WhatsApp Product

Inside your app, click 'Add Product' and select WhatsApp. This enables the WhatsApp Business API.

Where: Same app dashboard | Time: ~2 min

Step A5: Configure Webhook

Under WhatsApp > Configuration, set Callback URL to: <https://wapply-api.onrender.com/api/webhook>. Set a Verify Token (any random string you choose).

Where: WhatsApp > Configuration | Time: ~5 min

Step A6: Subscribe to Webhook Fields

Under the same page, click 'Manage' and subscribe to: messages, message_deliveries, message_reads.

Where: WhatsApp > Configuration | Time: ~2 min

Step A7: Add Test Numbers

Go to WhatsApp > Testing Numbers. Add up to 5 phone numbers (yours + client's) for testing. No approval needed.

Where: WhatsApp > Testing Numbers | Time: ~2 min

Step A8: Copy Credentials to Render

From WhatsApp > API Setup, copy: Access Token, Phone Number ID, App Secret. Update these in Render dashboard env vars.

Where: Render Dashboard | Time: ~5 min

Note: Your client can start testing on WhatsApp immediately using test numbers while verification processes. Steps A1-A8 can all be done today.

Phase B: App Review (After Business Verification)

Step B1: Request Standard Access

Go to App Review > Permissions and Features. Find whatsapp_business_messaging and click 'Request Standard Access'.

Where: App Dashboard > App Review | Time: ~10 min

Step B2: Record Bot Demo Video

Record a 1-minute screen recording showing: Customer sends 'Hi' > bot responds with catalog > customer places order > confirmation received. Use any test number.

Where: Your phone | Time: ~15 min

Step B3: Submit Review Request

Fill the review form: describe use case (WhatsApp bots for Indian small businesses), attach the video, confirm business verification is done.

Where: Same page as B1 | Time: ~5 min

Step B4: Wait for Approval

Meta reviews your submission. Typically takes 1-3 days. You'll get an email when approved.

Where: -- | Time: ~1-3 days

Phase C: Go Live (After App Review Approval)

Step C1: Register a Phone Number

Go to WhatsApp > API Setup > Add Phone Number. Either buy a virtual number (Rs 4-5/month) or use a SIM that has no WhatsApp account.

Where: WhatsApp > API Setup | Time: ~10 min

Step C2: Verify the Number

Meta will call or SMS a verification code to the SIM. Enter the code to confirm ownership.

Where: WhatsApp > API Setup | Time: ~2 min

Step C3: Generate Permanent Token

Click 'Generate Token' in API Setup. Copy the permanent access token (it never expires).

Where: WhatsApp > API Setup | Time: ~2 min

Step C4: Update Render Environment

Replace temporary credentials in Render with: permanent access token, registered phone number ID, app secret, webhook verify token.

Where: Render Dashboard > Env Vars | Time: ~5 min

Step C5: Verify Webhook is Active

Check WhatsApp > Configuration shows 'Active' status for the webhook. Send a test message.

Where: WhatsApp > Configuration | Time: ~2 min

Step C6: Redeploy Backend on Render

Go to Render Dashboard > Manual Deploy > Clear Build Cache & Deploy. This restarts the API with new credentials.

Where: Render Dashboard | Time: ~2 min

Step C7: Onboard Your First Client

Add client's business catalog, set up working hours, configure QR code. The bot goes LIVE immediately.

Where: Wapply Dashboard | Time: ~30 min

Step C8: Client Bot is Live!

Your first client's WhatsApp Business Bot is now serving real customers. Repeat for more clients.

Where: Wapply Dashboard | Time: ~-
